

Curriculum Vitae
FRANCESCO MIELE

I hold a PhD in Sociology and Social Research (University of Trento, 2012) and I am currently senior assistant professor at the University of Trieste (Department of Political and Social Sciences).

My main research interests regard the relationship between technology, care practices and organising and my primary fields of research are science & technology studies, sociology of health & illness and organisation studies. More specifically, over the last years I have been involved in international and national research projects on crucial topics such as the role of ICTs in the management of health conditions, the care processes that support people with chronic diseases inside and outside institutional settings, the invisible work of patients and caregivers in contemporary healthcare systems. I have developed an expertise in qualitative research with particular reference to techniques such as ethnographic observation, shadowing, in-depth and ethnographic interviews, cultural probes and focus groups.
