“Change has never happened this fast before, and it will never be this slow again”

Graeme Wood (2009)
The Digital Era: Big Data everywhere!

In 2017, we produced more data than in all the rest of human history (the same was true for 2015-2016) [source: IBM]
The Digital Era: Artificial Intelligence
The Digital Era: Future of Jobs

85% of jobs people will do in 2030 do not exist today (IFTF).

...but jobs in Data Science and AI will steadily grow... (WEF2016)

Data Scientist: The Sexiest Job of the 21st Century

50 Best Jobs in America

This report ranks jobs according to each job's Glassdoor Job Score, determined by combining three factors: number of job openings, salary, and overall job satisfaction rating.

1. Data Scientist
   - 4.8/5 Job Score
   - $110,000 Median Base Salary
   - 4,524 Job Openings

International Master Programme in Data Science and Scientific Computing

The degree is offered by the University of Trieste, in collaboration with the University of Udine, International School for Advanced Studies (SISSA), International Centre of Theoretical Physics (ICTP), and with other research institutions and companies of the area of Trieste - the European Capital of Science in 2020!
International Master Programme in Data Science and Scientific Computing

3 CURRICULA

IN ENGLISH

Artificial Intelligence and Machine Learning
- Advanced Programming and Algorithmic Design
- Foundations of AI and ML
- Cyber-Physical Systems
- Deep Learning
- Reinforcement Learning

Data Science and Applications
- Probabilistic Machine Learning
- Data Management for Big Data
- Statistical Learning for Data Science
- Information Retrieval and Data Visualization

Computational Science and Engineering
- Advanced Numerical Analysis
- Optimization Models
- Stochastic Modelling and Simulation

Core Courses

I Sem I Year
- Internship (6 cfu)
- Seminars (6 cfu)
- Thesis (24 cfu - experimental or in a company)

I Year

II Sem I Year

II Year

Specialisations

I Year

II Year

- Data Science for Healthcare
- Data Science for Life Sciences
- Data Science for Social Sciences
- Data Science for Transportation
- Geodata Science

- Computational Fluid Dynamics
- Computational Physics
- Computational Chemistry
- Computational Cosmology
- Quantum Computing
International Master Programme in Data Science and Scientific Computing

Who can Enroll?

Students with a Bachelor in Mathematics, Physics, Informatics, Statistics, Engineering, Chemistry, Life and Natural Sciences, Economics, which are skilled in maths and informatics.

Are Scholarships Available?

There are scholarship giving partial support funded by companies (about 2600 euros), granting an internship in the second year. There are also scholarships covering full support (about 800 euros per month) from SISSA and scholarships from Collegio Fonda.

Where are the lectures?

Lectures will be held in Trieste, between the University, SISSA, and ICTP.
Available places?

There are 60 places, 20 for international students and 40+ for EU students.

Selection procedure?

Selection is based on titles and on an interview, in English. You need a B2 English certificate. If you do not have it, your English will be tested during the interview!

What if I work?

There is an option for working students, to spread the program in 3 or 4 years. Frequency of lectures is not mandatory but recommended!
Un mare di ragioni per studiare a Trieste
