Towards Trieste European City of Science 2020

“Our vision of Trieste as a dynamic hub for science, business and society interactions in a wider area such as the North-East of Italy and the Central Eastern European countries has been the true winning key.”

(Stefano Fantoni, Champion ESOF2020)

Trieste, city of science

Trieste hosts **more than 30 national and international centres** and companies working in research and higher education, 5000 permanent foreign scientists and some 13000 students and researchers.

ESOF2020 Trieste: Vision and Goals

Strengthen

a scientific, technological network among the Central Eastern European countries linked to the Trieste Science System

Establish

a platform for implementing research infrastructures in Central Eastern European countries and to bridge existing gaps

Integrate and connect

this network with respect to the Mediterranean and North African countries and to the Central Asian countries (Silk Road project)

Cooperate and organize exchanges

among European academies, associations dedicated to science commitment and communications, and with governments in Central and Eastern Europe

Develop

an East-Europe Science Museum which may act as a dissemination centre for science and technology to citizens belonging to the CEE region

Science and Society

Cooperation among scientists, administrators, entrepreneurs, policy makers and society is crucial to face and overcome the global challenges threatening our future

Future career for the young people
